

B21*Pure Line*

Origin:	Italy
Breeder:	L'AGRICOLA S.r.L
Contact:	agricola2@agricola.ws
Type:	filler
Description	
<p>This variety is a pure line, with height around 220 cm. The well developed stalk guarantees a stronger structured base for the plant and ensures a more erect stature resistant to bending. The short distance between nodes and the upward angle of the leaves give this variety a compact aspect. The variety B21 was selected in an effort to produce a highly versatile and productive plant while maintaining strong leaf qualities. It normally produces 40 usable leaves with low nicotine content. This variety is particularly interesting for its optimal curing properties. Leaves tend to develop the “nocciola” coloring that is characteristic to Burley filler style tobacco when presented with proper curing condition.</p>	

MAIN CHARACTERISTICS

Resistances:	
Black root rot:	T
Powdery mildew:	T
Blue mold:	S
PVY:	T
TMV:	T
Nematodes:	nd
Other:	

Production data (2013):		
Country:	Acreage:	% of total acreage:
Italy		

T: tolerant – S: sensitive

nd: no data
