

FB73*Pure Line*

Origin:	Italy	
Breeder:	L'AGRICOLA S.r.L	
Contact:	agricola2@agricola.ws	
Type:	filler	
Description		
<p>This variety is a Pure line, with height around 290 cm. The well developed stalk guarantees a stronger structured base for the plant and ensures a more erect stature resistant to bending. The short distance between nodes and the upward angle of the leaves give this variety a compact aspect. The variety FB73 was selected in an effort to produce a highly versatile and productive plant with increased tolerance to infection, particularly Fusarium and Phytophthora, while maintaining strong leaf qualities. FB73 normally produces about 45 usable leaves. This variety is particularly interesting for its optimal curing properties and for the "nocciola" coloring that is characteristic to Burley filler style tobacco when presented with proper curing conditions.</p>		

MAIN CHARACTERISTICS

Resistances:	
Black root rot:	T
Powdery mildew:	T
Blue mold:	S
PVY:	T
TMV:	T
Nematodes:	nd
Other:	

Production data (2013):		
Country:	Acreage:	% of total acreage:
Italy		

T: tolerant– S: sensitive
nd: no data
