

**FB75***Pure Line*

<b>Origin:</b>	Italy
<b>Breeder:</b>	L'AGRICOLA S.r.L
<b>Contact:</b>	agricola2@agricola.ws
<b>Type:</b>	filler
<b>Description</b>	
<p>This variety is a Pure line, with height around 320 cm. The well developed stalk guaranties a stronger structured base for the plant and ensures a more erect stature resistant to bending. The short distance between nodes and the upward angle of the leaves give this variety a compact aspect. The FB75 variety was selected in an effort to produce a highly versatile and productive plant with increased tolerance to infection, particularly Fusarium and Phytophthora, while maintaining strong leaf qualities. This variety normally produces about 40 usable leaves. FB75 is particularly interesting for its optimal curing properties and for the "nocciola" coloring that is characteristic to Burley filler style tobacco when presented with proper curing conditions.</p>	

**MAIN CHARACTERISTICS**

<b>Resistances:</b>	
<b>Black root rot:</b>	T
<b>Powdery mildew:</b>	T
<b>Blue mold:</b>	S
<b>PVY:</b>	T
<b>TMV:</b>	T
<b>Nematodes:</b>	nd
<b>Other:</b>	

T:tolerant– S: sensitive

nd: no data
