

## Pallagi 12

*Male Sterile Hybrid*

<b>Origin:</b>	Hungary	
<b>Breeder:</b>	Agroport-D Kft.	
<b>Contact:</b>	www.agroport.hu	
<b>Type:</b>	filler	
<b>Description</b>		
<p>This is a tall F1 hibrid with high yield. The number of harvestable leaves is 22-24. Its resistance to potato virus Y is high. The growth rate is very dynamic in the seedbed and in the field. Yield potential and yield stability is high (3100-3300 kg/ha). The ripening rate is medium-late. If properly cured it produces leaves with good colour and leaf tissue and very good smoking quality.</p>		

### MAIN CHARACTERISTICS

<b>Resistances:</b>	
<b>Black root rot:</b>	R
<b>Powdery mildew:</b>	nd
<b>Blue mold:</b>	nd
<b>PVY:</b>	R
<b>TMV:</b>	R
<b>Nematodes:</b>	nd
<b>Other:</b>	

**R:** resistant – **S:** sensitive  
**nd:** no data

<b>Production data (2010):</b>		
<b>Country:</b>	<b>Acreage:</b>	<b>% of total acreage:</b>

<b>Agronomical data and Chemical data</b>			
		<b>% of AERET standard *</b>	<b>% of local standard**</b>
<b>Yield (kg/ha):</b>	3400	110	100
<b>Grade index:</b>	80	105	105
<b>Maturity:</b>	medium		
<b>Nicotine content (%):</b>	3.0	100	100
<b>Reducing sugars (%):</b>	-	-	-

\* AERET standard variety: **TN 90**

\*\* local standard variety: **Pallagi 5**
