Description		
<p>This variety is a Pure Line which produces plants with a height of around 140cm. It has been selected to obtain short size plant to favour mechanical harvesting. It has a medium-large stalk size, an upright stance, and very good environmental stability. Breeding work was carried out in an effort to produce an early maturing plant with a high number of leaves. It usually produces 25 usable leaves. Excellent "full flavour" tobacco, this variety prefers good/ medium fertility and sandy soils. Early maturity line, susceptible to Black Root Rot, excellent curability. High yields and excellent smoking quality.</p>
