Description		
<p>This variety is a Pure Line which produces plants with a height of around 150cm. It has been selected to obtain short size plants to favour mechanical harvesting. Breeding work obtained appropriate stalk size, upright stance and good environmental stability. The principal scope of breeding work for this line was to obtain a variety that was highly versatile with regards to both climate and cultivation areas, while maintaining its excellent commercial qualities. This variety produces 24 usable leaves. Excellent "full flavour" smoking tobacco, this variety prefers good/medium fertility soils. Late maturity line. Easy to cure, high yields.</p>
