Description		
<p>This variety is a Pure Line which produces plants with a height of around 155cm. Principle characteristics of this line include its short size and early maturing allowing for mechanical harvesting and more efficient crop distribution respectively. The principal purpose of breeding work was to obtain high quality leaves of light green colour and thin structure in order to obtain orange leaves in the curing process. It produces 25 usable leaves. This variety performs best in medium/low fertility soil, high yields, excellent "full flavour" smoking quality and nicotine content is medium/high.</p>
