

PVH 2310

Hybrid

Origin:	Brazil	
Breeder:	ProfiGen do Brazil	
Contact:	www.profigen.com.br	
Type:	Flue-cured	
Description		
<p>PVH2310 is recommended for regions with a shorter growing season or to maximize the use of the curing barns in areas with a longer growing season. This hybrid combines early maturity, excellent yield potential and resistance to a large number of diseases. This hybrid is resistant to TMV, PVY, black shank race 0, races 1 and 3 of the southern root-knot nematode and to the tobacco cyst nematode <i>Globodera spp.</i> PVH2310 produces excellent yields, leaves of high quality tobacco and is easy to cure.</p>		

MAIN CHARACTERISTICS

Resistances:	
Black root rot:	S
Powdery mildew:	S
Blue mold:	S
PVY:	R
TMV:	R
Nematodes:	R
Black Shank: Php Race 0	R
Other:	

Production data (2015):
